Robin Lansiquot

Application Security Engineer | SCA, SAST & Vulnerability Management

lansiquo@gmail.com 647-204-5818 Toronto, Canada linkedin.com/in/robin-lansiquot

dotrobin.dev

Summary

Application security engineer with 5+ years in financial services, specializing in SCA, SAST and vulnerability management. Co-led an enterprise SCA rollout across 60,000+ applications and thousands of developers, and built open-source tools to triage SCA and SAST findings (sca-triage, sast-triage). eJPT certified and pursuing PNPT, with hands-on offensive security training focused on assessing exploitability and prioritizing remediation from an attacker's perspective.

Professional Experience

RBC 03/2023 – 10/2026 | Toronto

Staff Data Engineer · 10/2025 – 10/2026

- Centralized security logging for 60% of Global Functions Technology production servers with Splunk and Dynatrace
- Hardened Splunk Enterprise cluster authentication by implementing SAML SSO
- Supported production change requests and troubleshooting for Splunk Enterprise

Application Security Specialist · 03/2023 – 10/2025

- Co-led an enterprise SCA rollout, extending open-source scanning to 60,000+ applications and thousands of developers
- Evaluated and selected AppSec tools, integrating automated security testing into CI/CD pipelines
- Performed SAST and SCA reviews, giving application teams prioritized, actionable remediation guidance

Vulnerability Management Specialist, *Bank of Canada* 08/2021 – 03/2023 | Ottawa

- Triaged emerging CVEs with exploitability analysis, producing risk-ranked remediation priorities for application owners
- Drove remediation with engineering teams, validated fixes and briefed stakeholders on risk acceptance decisions

Security Co-op Terms, *Enbridge / BMO / NGen / Bank of Canada* 08/2019 – 08/2021 | Toronto

- BMO - Vulnerability Management Analyst: triaged and tracked vulnerabilities, escalating critical issues to owners
- Enbridge - Information Security Administrator: performed DAST scans with Fortify WebInspect, triaged findings and reported validated vulnerabilities to application teams
- Bank of Canada / NGen - Security Analyst: access administration, alert triage and monitoring

Projects

sca-triage , *SCA triage for npm dependencies* 2026

Prioritizes npm vulnerabilities using static import evidence; applies upgrades and runs tests

sast-triage , *SAST triage for Python pull requests* 2025 – 2026

Reviews Python pull requests with Semgrep; fails checks on new P1 findings or incomplete scans

Skills

Application Security
SCA: JFrog Xray, Snyk Open Source, Nexus Lifecycle / IQ
SAST: Checkmarx, Snyk Code, Semgrep
Software Supply Chain: Nexus Firewall, JFrog Artifactory

Development
Python (FastAPI), JavaScript (Node.js), GitHub Actions, REST APIs

Penetration Testing
Nmap, Burp Suite, Metasploit; Linux/Windows privilege escalation

Certificates

eJPT (eLearnSecurity Junior Penetration Tester)

PNPT (Practical Network Penetration Tester)
In progress (est. Q1 2027)

Education

Software Development & Network Engineering, *Sheridan College*
